

Mecin SENSE - Industrial Temperature Alert System

Overview

Get informed of with temperature of your system or place, any where any time, Just plugin Mecin SENSE

Mecin-Sense is GSM/GPRS based SMS & Email Alert and Temperature Monitoring system with higher Efficiency and Advanced functionality. It provides scheduled Temperature alert at regular pre-defined interval, high and low level events or user based query request.

User can have regular status alert of temperature via SMS or Email. Mecin Notify supports Native GSM Quad band network (850/900/1800/1900MHz), User needs to insert a Regular SIM card to Mecin Notify to get alerts. Mecin Notify also supports Email alert, it uses GPRS for that purpose.

User can configure the Temperature alert limit as per requirements and user can request for Temperature data any time he wants using SMS .

Specification

GSM Modem Frequency	850/900/1800/1900 MHz
Supply	10 to 35 VDC
Temperature Sensor	Digital – 0 to 60 ° C
Output Channel	Relay Output(1A@240VAC)
Configuration	Android App. based
Alert Type	SMS and CALL
Maximum User Number	10
Message String Length	60 Characters Max.
Operating Temperature	0 to 60 ° C

Features

- Configurable SMS string
- Alert to multiple mobile numbers
- Low power consumption
- Easy and simple to integrate
- 1- channel RELAY output control
- 1- channel temperature monitoring

Applications

- Cold storage monitoring
- Pharmaceutical industries
- Server room monitoring
- Food industries
- Automation industries
